Website: <http://www.cuceaa.org/>

Dear Alumnus and friend:

We announce with great pleasure that the Reunion of the former students, staff and teachers of the erstwhile Applied Chemistry Department and Chemical Engineering Department, University of Calcutta, the present students and all others associated with the Department, will be celebrated on **December 23 and 24, 2015**. Beyond its traditional businesses, regular features and activities, there will be events on International seminar, Students seminar, Alumni interactions, sports and cultural programs. The program of award for excellence to the alumni and felicitation to the retired teachers and non-teaching staff will also be there. There are plans for publication of a Souvenir, Seminar Proceedings, Alumni Register and Departmental Profile on the occasion.

During last Reunion we were in high feelings to felicitate "Silver Jubilee Year" Alumni (after re-organization) of the Department. As the Reunion of the department comes after every third year, we have planned this time to felicitate the Alumni who have conceded their "Silver Jubilee Year" in 2013 to 2015.

The Reunion program including the activities contemplated can be a success only with the whole-hearted support and active participation of the alumni and others associated with the Department. We solicit your help in the form of suggestions and advice, contributions, in any form, for the Alumni Meet.

As you know we have a web site (<http://www.cucheaa.org/>) for our alumni. The site is active and many of you are surfing the site regularly. In spite of that we are lacking data of our alumni. Many of our Alumni have changed their jobs since the last Reunion and we are in the process of updating the Alumni Register along with e-mail addresses. We need your help in this matter. Please send us your details through e-mail given or fill in the Registration form and mail it to us as early as possible.

Soliciting your best co-operation and looking forward to meet you on the occasion.

Basudeb Barman
(Alumnus 1960)
